

A large, circular chandelier with a black top ring. From the ring, hundreds of thin, vertical optical fibers hang down. At the end of each fiber is a small, white porcelain butterfly. The butterflies are illuminated from within, creating a soft, glowing effect. The overall appearance is that of a rain of light or a field of light butterflies.

Niagara Chandelier

## LLADRÓ

Oltre alle celebri statuine di porcellana, Lladró esplora con esiti suggestivi il campo della luce: è suo il lampadario *Niagara Chandelier* composto da 308 farfalle di porcellana sospese a fibre ottiche Sideglow.

In addition to its celebrated porcelain figurines, Lladró explores the field of light with impressive results, like the *Niagara Chandelier*, composed of 308 porcelain butterflies suspended on Sideglow optical fibres.
